

VKS

Pneumatic power chuck with wedge hook
Usable in a stationary or rotary manner
*For use on turning, milling, grinding
and special machines*

VK systems

Option 1 Lateral air connections

Option 2 Centric air connections

Concentricity	0,03mm
Repeat accuracy	0,01mm
Run out	0,01mm

Versions

1. Compressed air connections optionally on the side or in the center
2. With rotary feed-through (opt.) in the center

Application

Milling
Turning
Grinding
Special mechanical engineering

Sizes (mm)

Ø160

Brief overview

- Piston control via connections optionally on the side or in the center
- Jaw chucks usable in a stationary or rotary manner
- Compatible with Schunk top jaws
- Handling with compressed air gun possible
- Strong wedge hook power chuck

In detail

1. Base jaws straight teeth 1/16" × 90 degrees
2. Slot nut with screws for top jaws
3. Air connection for hose outside Ø 6mm
4. Attachment via bolt circle with six screws
5. Lubrication and Maintenance
6. On customer request available with special jaws
